TARGET ROLES

→ **React.Js Developer | Node.js Developer | FullStack Developer (MERN)**

PROFILE SUMMARY

Full Stack Developer with 2.5 years of experience creating reliable and user-friendly web applications. Strong background in building end-to-end solutions, improving performance, and working closely with teams and clients to deliver projects successfully.

CORE COMPETENCIES

React.Js | Node.Js | Redux Toolkit & RTK Query | JavaScrip (ES6+) | TypeScrip | HTML5 | CSS3 | SCSS | Responsive Web Design | Material UI | Shadcn/UI | Tailwind CSS | Component-based architecture | Code reusability | UIOptimization| Express.Js | Restful APIs | Authentication & Authorization (JWT, OAuth, Google login) | Socket.IO & WebSocket | Payment Gateway Integration (Razopay) | API Versioning | Middleware | Error Handling | Scalable backend architecture | MVC designing pattern | MongoDB | Mongoose ODM | Aggregation framework | XSS, CSRF | CORS protection | Rate limiting | Git | Gitlab | GitHub | Postman | Swagger | Docker | VS Code | Windsurf AI | Agile methodology | Highchart | Rechart

PROFESSIONAL SUMMERY

Comp Name : Techstalwarts Software Development LLP

- Built and maintained **scalable, high-performance web applications** using the **MERN stack (MongoDB, Express.js, React.js, Node.js).**

- Developed **reusable UI components** and implemented **state management** with **React.js and Redux Toolkit, accelerating development cycles and improving code maintainability.**

- Enhanced **database performance** through advanced query optimization and indexing, resulting in a **25% improvement in responsiveness** and a significant reduction in user-reported issues.

- Collaborated closely with **UI/UX teams and clients** to gather requirements and deliver multiple **production-ready modules** aligned with business goals.

- Debugged, optimized, and maintained **large-scale enterprise applications**, ensuring **high system uptime** and seamless performance across projects, including those for **V5 Global**.

- Integrated **Windsurf AI** into the development workflow, improving **code efficiency, accuracy, and debugging speed**.

PROJECTS

1. MagicBus → Built an **analytics dashboard** for performance tracking that **streamlined reporting workflows** and improved **data visibility and decision-making efficiency**.

2. MultiAct → Developed a **portfolio analysis platform** featuring **interactive data visualizations** and **internal performance analytics**, enhancing user insight and engagement.

3. Tomor   → Implemented a **retail and order management system** with **role-based access control** for **Admins, Store Owners, Supervisors, and Customers**, ensuring secure and efficient operations.

4. Jarvis   → Integrated secure authentication and APIs to enable reliable portfolio management and user access.

TECHNICAL SUMMARY

Category	Proficiency
Frontend Development	90%
Backend Development	80%
Database Management	75%
Security & Optimization	80%
DevOps	50%
Architecture & Methodologies	90%
Real-time System	70%
Data Visualization	95%

CERTIFICATIONS

Frontend :

    1. React.js Developer Certification — *Tech Paathshala, Mumbai (2023)*

        → Mastered React.js fundamentals, Hooks, state management with Redux Toolkit, and UI development using Material UI and modern component-based architecture.

Backend :

    2. Node.js Developer Certification — *Tech Paathshala, Mumbai (2024)*

        → Gained hands-on experience in building REST APIs, implementing JWT authentication, integrating MongoDB with Mongoose, and optimizing backend performance.

ACHIEVEMENTS SUMMARY

→ Developed 4+ interactive Fullstack Projects.
→ Led a 5-member team to design & deploy a college website, increasing student engagement by 40%.
→ Promoted to Lead Intern after consistently outperforming peers in project delivery.

AREAS OF INTEREST

Full Stack Web Development | Frontend Engineering | Backend Architecture | REST API Development | Real-Time Applications | Scalable System Design | Authentication & Security | UI/UX Optimization | Cloud Deployment | CI/CD Pipelines
